

**ABSORBENT PRODUCT WITH
REDUCED REWET PROPERTIES UNDER LOAD**

ABSTRACT

An absorbent article having a substantially liquid impervious outer layer, a substantially liquid pervious inner layer overlaying and associated with the outer layer,
5 an absorbent core disposed between the outer layer and inner layer, and an apertured film disposed between the inner layer and the absorbent core. The apertured film has a liquid impervious film surface with a plurality of protrusions extending therefrom towards the absorbent core. Each protrusion terminates at an aperture in the apertured film. The absorbent article has a 200 milliliter rewet under load of less than about 1.25
10 grams and a 300 milliliter rewet under load of less than about 4 grams
